Recommendation

I am pleased to recommend **Amanda Kate R. Dandan** for the PCAFPD Scholarship. As her Science teacher, I have had the opportunity to observe their academic performance, attitude toward learning, participation in class activities, and interactions with classmates.

In my Science class, she has demonstrated a genuine willingness to learn and a responsible approach to academic tasks. The student participates actively in classroom discussions, laboratory activities, and collaborative work, showing curiosity and an eagerness to understand scientific concepts beyond simply completing requirements. When faced with challenging lessons or activities, the student demonstrates perseverance, patience, and the willingness to improve.

One quality I particularly appreciate is the student's ability to work well with others. During group activities, she demonstrates cooperation, respect, and responsibility. She is willing to share ideas, listen to classmates, and contribute to accomplishing the group's objectives. These qualities reflect developing leadership skills—not only through taking initiative when needed but also through being dependable and supportive of others. She understands the importance of fulfilling responsibilities and demonstrates the potential to use educational opportunities for personal growth and, ultimately, to contribute positively to the community.

I believe that receiving this scholarship would provide her with a valuable opportunity to continue pursuing their education and developing their abilities. With continued guidance and opportunities, I am confident that the student can further strengthen their academic, leadership, and service-oriented qualities.

For these reasons, I am pleased to support the application of **Amanda Kate R. Dandan** for the PCAFPD Scholarship. I hope the committee will give the student full consideration for this opportunity.
