Good day,

I would like to express my utmost confidence to the applicant Giesha Alcina E. Castro who had constantly demonstrated academic excellence and great moral character during her senior high school years. I, Ms. Maria Luz Baquit, as the applicant's former teacher in General Physics and General Chemistry, is a first-hand witness of her dedication to pursue education and eagerness to develop skills that will greatly impact the country. Moreover, Ms. Giesha displayed leadership skills that brought people to work together towards one clear goal, exercised critical thinking skills in solving complex engineering problems, all while participating as one of the main actresses and management roles of STI College Global City's theater group that aims to expose audiences to contemporary social issues.

On that note, as Ms. Giesha is continuing to pursue and exercise greatness in the course Bachelor of Science in Industrial Engineering, I am wholeheartedly recommending this applicant to be one of the beneficiaries of the Peace Corps. Foundation Scholarship Program with utmost faith that she will make meaningful use of the opportunity given to her and carry forward the same dedication and integrity that she has consistently demonstrated as a student.

Respectfully,
Ms. Maria Luz Baquit
