Subject: Scholarship Recommendation for Aldrinne T. Teves

Through this letter, I would like to make manifest my profound recommendations for **Aldrinne T. Teves**, Grade 12 STEM student specializing in the Engineering track at Himamaylan National High School, for the PCAFPD Undergraduate Scholarship Program.

In the last school year, he assumed Vice Presidency for Physics of the Ad Lumina Scientia, the official Science Club of our school, which unveiled a student-leader potential facilitative of outstanding academic excellence, character integrity, and a natural turn for the sciences.

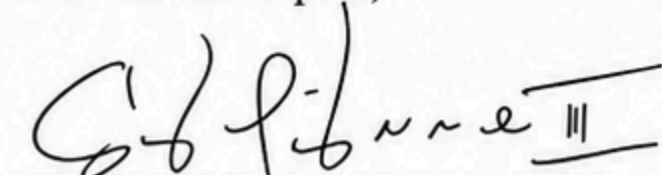

Aldrinne had been constantly demonstrating exceptional academic dedication, maintaining an outstanding Grade Weighted Average amidst the responsibilities set by our organization. However, beyond high academic capability, he seeks to hone his growing problem-solving skills, creativity, spatial design and technical discipline qualities which would earn him a higher education degree in BS Architecture.

Financial challenges are sometimes what set him back. But, he keeps high motivation for targeting his goals through moral integrity, socioeconomic resilience, and academic commitment with a deep sense of community service, reflecting the values that the PCAFPD scholarship seeks to instill -- which I found as his adviser, worthy of the chance you offer.

I assure that this PCAFPD Scholarship will be highly valued by Aldrinne and will soon bear meaningful outcomes that the community and our country at large will benefit in the future. I, therefore, give him my profound recommendation which I hope you would receive.

Should you require any further information regarding his academic background or qualifications, please feel free to contact me.

With utmost respect,

SILVESTRE M. SOLOMON III

Teacher I / Ad Lumina Scientia Adviser,
Himamaylan National High School
